

Safer Holiday Gatherings

Gathering with people outside your household increases risk of coronavirus transmission.

If you choose to gather for the holidays, here are steps you can take to lower you and your family's risk:

- Get tested before traveling and quarantine while awaiting results
- Consider the level of transmission where you are traveling
- Safest travel would be by car
- Keep gatherings small
- Keep gatherings stable; that is, do not participate in multiple gatherings with many different households.
- Stay outside, use heaters and fire pits as needed
